

ERMAN RAMICHI

Skopje, North Macedonia | +38970934254 | ermanramiqi@icloud.com | ermanramichi.com | mk.linkedin.com/in/ermanramichi

Software engineer with hands-on experience in Java, Spring Boot, Angular, and RESTful architectures. Strong foundation in OOP, clean code, and modular design, with experience in structured data management and system optimization. Passionate about backend development and building scalable, maintainable enterprise applications.

TECHNICAL SKILLS

Programming languages

Java, JavaScript, TypeScript, Python

Frontend Technologies

Angular, HTML5, CSS3, Tailwind CSS

Backend Technologies:

Spring Boot, Node.js

API & Architecture:

RESTful APIs, MVC Pattern, OOP, SOLID Principles, JSON, HTTP Protocol

Databases:

PostgreSQL, Basic SQL (CRUD operations, joins), MongoDB

Tools & Workflow:

Git, GitHub, Postman, Docker (basic), DBeaver, Agile/Scrum

Web & Performance:

CMS Management, SEO Optimization, Data Structuring, Performance Monitoring, UI/UX Optimization

PROFESSIONAL EXPERIENCE

Web Administrator (Nepton MK | Nov 2024 – Present)

- Managed and optimized structured product data (5000+ products) within the company's e-commerce platform.
- Ensured data consistency, validation, and accurate content structuring across the system.
- Analyzed website performance metrics and user interaction data to identify optimization opportunities.
- Collaborated with marketing and sales teams to align technical implementation with business requirements.
- Contributed to improving purchasing workflows, page performance, and overall system usability.
- Worked with CMS systems and database-driven content structures to maintain scalable digital architecture.

Conferences & Training

- Business Leader: Leadership in Business
- AI x Ecommerce & Marketing That Converts
- Ecommerce Conference 2025
- Startup Revolution Summit

TECHNICAL PROJECTS

Product Price Comparison Web Application (Personal)

- Designed and developed a web application for comparing product prices.
- Structured and processed product data for efficient filtering and comparison.
- Designed intuitive UI/UX focused on user decision-making.
- Focused on scalability and data transparency principles.

Progressive Web App (PWA) Strategy proposal

- Designed and proposed a PWA solution to modernize an existing website.
- Focused on mobile performance optimization and improved engagement.
- Analyzed technical feasibility and digital transformation benefits.

Core competencies

- Analytical and structured thinking and Technical problem-solving
- Cross-team collaboration
- System optimization mindset
- Continuous learning and adaptability
